

# BRU Server™ Backup and Recovery Software

## End to End Digital Asset Management with BRU Server™, CatDV, and DAX Broadcast Archive

Complete end-to-end solutions for the Media & Entertainment Industry that provide a single source solution for the ingest, storage, management, and archival of media assets.

By combining TOLIS Group's existing ArGest® disk and tape storage technologies with BRU Server™, CatDV and DAX Broadcast Archive, TOLIS Group is able to provide integrated solutions of hard drive and SSD storage combined with LTO standalone and library tape solutions. It's all you need to manage and archive your organization's deluge of digital content.

Solutions range from a single LTO-8, LTO-7, or LTO-6 standalone tape drive to those with up to 500TB of RAID disk as well as multi-LTO library configurations ranging up to 540 tape slots and 42 tape drives.

# BRU Server™ Hardware/Software bundles with DAM/MAM

All BRU Server™ hardware/software bundles include new (not gray market or refurbished) tape devices, media, SAS HBA, all required SAS cables (Fibre channel HBAs available for additional cost, customer uses own Fibre cable in Fibre configurations), as well as BRU Server software. Software support for Linux and Mac OS X® 10.5 through 10.13, and Windows as clients.

All technical support for the bundled hardware is provided directly by TOLIS Group Technical Support, eliminating the need for the consumer to contact multiple manufacturers for help. Instead, one phone call to TOLIS Group Technical Support for all components including DAM/MAM software, when purchased as a bundle, provides you with technical support for all of the purchased hardware and software.

BRU Server™ Bundles are available with Thunderbolt connectivity!

## SAS Standalone Bundles

### BRU Server™ ArGest® Small Office Standalone Models with DAM/MAM

One or two drive LTO-8, LTO-7, or LTO-6 integrated into ArGest® Quiet Desktop Cube or 1U Rack, SAS cable, HBA, media, BRU Server™ software, CatDV software and DAX Broadcast Archive Software configurations.

## SAS Automation Bundles

### BRU Server™ ArGestS® Small/Medium Office Automation w/ DAM/MAM

One 8 slot, single drive LTO-8, LTO-7, or LTO-6 autoloader, SAS cable, SAS HBA, media, BRU Server™ software, CatDV software and DAX Broadcast Archive Software configurations.

### BRU Server™ ArGest® Medium Office Library w DAM/MAM

One 24 slot, single drive (expandable to two drives) LTO-8, LTO-7, or LTO-6 library, SAS cable, SAS HBA, media, BRU Server™ software, CatDV software and DAX Broadcast Archive Software configurations.

### BRU Server™ ArGest® Business Class FLEX Library w/ DAM/MAM

One 40 slot, single drive (expandable to 21 drives and 280 slots) LTO-8, LTO-7, or LTO-6 library, SAS cable, SAS HBA, media, BRU Server™ software, CatDV software and DAX Broadcast Archive Software configurations.

## SAS Flex PLUS 6800 Bundles

### BRU Server™ ArGest® Flex PLUS 80 to 540 Tape Slot Library w/ DAM/MAM

Expandable, stackable units - up to 7 total units - that take you from 80 to 540 total tape slots, and from 1 to 42 total tape drives. This solution allows the user to start small and grow over time. SAS units ship with SAS cable, SAS HBA, media, BRU Server™ software, CatDV software and DAX Broadcast Archive Software configurations. Fibre channel customer should use approved FC HBA/Switch. LTO-8 through LTO-6 is available.
